

Farewell Flowers from *Wild and Wonderful*

Wild and Wonderful would like to help you celebrate the life of your loved one by creating for them a floral tribute which will reflect their love of nature and the environment. Working to your wishes and using the best of the season's flowers we will create a beautiful tribute with a natural and informal design. If you wish to incorporate a particular flower or colour scheme that is not in our gardens or cut flower beds, we will try our best to source it for you. If you would like to explore what we are able to offer and see if we can produce what you would like, please email Denise at deniseo1@sky.com.

More about *Wild and Wonderful*

We are part of TWIGS, a charity which provides services for people experiencing mental health issues. We grow all our flowers organically at TWIGS Community Gardens and the flowers we grow are a mixture of well-loved cottage garden favourites blended with the best of new varieties. From snowdrops and daffodils through to late summer highlights such as dahlias and Michaelmas daises, our bulbs, annuals, perennials and foliage encapsulate the essence of each season. Our Wild and Wonderful team includes service users and volunteers at TWIGS who sow the seeds, nurture the young plants and tend the flowers. We try to use only biodegradable products in the construction of our arrangements and our aim is to be totally plastic free by 2021. All the money we raise goes directly to TWIGS to support their vital work.
